Ultra Lightweight Family

You want cutting-edge wheelchair technology to keep pace with the demands of your active life. For over 30 years, Quickie has listened, researched, tested and delivered. Through state-of-the-art design, superior performance and a customized build, Quickie empowers you to live without limits.
## Why Quickie?

**You drive our design.** Quickie wheelchairs are designed for you and by you. In development, we consider how you interact with your wheelchair to maintain maximum efficiency, performance, fit and style. This results in the creation of products that are innovative, durable, versatile and customizable. That is the Quickie Advantage.

### Quickie Advantage

**Innovation.** We are continually developing new products, improving our flagship products and offering new options and solutions to enhance your lifestyle.

**Quality and Durability.** Quickie wheelchairs undergo rigorous testing that surpasses industry standards, so you can be confident that your product will hold up and perform throughout its lifetime.

**Versatility.** We offer a comprehensive portfolio of products to meet a wide range of individual lifestyles and clinical needs. Once you choose a Quickie, our goal is that it continues to be the right chair for you. We offer maximum adjustability in our designs, interchangeable parts and the True Fit Growth Program* to help accommodate changes in condition, environment or lifestyle that you may experience.

**Built-4-Me.** Our Built-4-Me Team is dedicated to creating product customizations beyond what is listed on our product order forms. Experts in the engineering and manufacturing of custom rehab products will listen to your specific requests and build a chair as individual as your fingerprint!

### Folding Family
- Quickie 2
- Quickie 2 Lite
- Quickie QXi

### Ultra Lightweight
- Coding & Justification

### Complement Your Quickie –
- JAY® Cushions and Backs

---

---
The lightest wheelchair we’ve ever manufactured, the Quickie® Q7™ NextGen combines cutting edge ultra lightweight wheelchair technology, ergonomic design, and premium materials.

**7000 Series Aerospace Aluminum**
- Fully loaded configuration weighs as low as 13.3 lbs!
- Ovalized tubing in frame, axle plate, and caster housing decrease flex for an incredibly strong, rigid ride
- Increased frame bend strength improves propulsion efficiency

ShapeLoc Technology is the process of converting an aluminum frame into stronger, more rigid T6 Aluminum. The open frame is fabricated using 7000 Series Aluminum then heat treated to convert the metal to T6 Aluminum.

**The Advantage:** Stronger metal + thinner tube walls = an unbelievably lightweight chair!

### Performance Geometry
- Custom frame lengths provide individualized maneuverability and stability
- Three caster wheel placement options ensure optimal performance

### Adjustable and Active Rigid Frames
- **Adjustable:** Quick back angle adjustments accommodate changing environments and conditions
- **Active Rigid:** Ideal for those who know exactly what they need. A fully rigid backrest and axle plate reduce the overall weight by an average of one pound and transfer energy directly from your arms to the axles for the most efficient propulsion.

The Quickie® QRI™ is an ultra lightweight rigid wheelchair with a strong open frame design perfect for your on-the-go lifestyle.

Commuter-Friendly Design
- Ultra lightweight and durable aluminum frame with a 265 lb. weight capacity
- WC-19 Transit Approved up to 265 lbs.
- Open frame and fluid caster housing design for a stylish look
- Small footprint for maneuverability and easy transport

Comfortable Fit
- Standard 0” or 1” frame inset options
- 0.5”– 3” of Center-of-Gravity axle plate adjustment
- 70°, 80°, and 85° front frame angle options

Quickie’s Top Options
- Folding Lock Down Angle Adjustable Back
- Wide range of seat widths, seat depths, armrests, wheels, tires, and handrim

Quickie GP™ Series
As one of the first ultra lightweight rigid frame wheelchairs created over 25 years ago, the Quickie® GP™ is a true original.

Proven Performance
- One-piece, box frame construction delivers an unmatched rigid feel
- Multiple front frame options
  - Standard
  - Tapered for increased maneuverability
  - Swing-Away for easy transfers or option of elevating legrests
- Optional Quickie Performance wheels and up to 12° of camber for excellent sports performance
- Optional Quickie Xtender power assist wheels

Versatile, modular, and available in 64,000 configurations, the Quickie 2 has been the industry’s favorite ultra lightweight manual chair for over 25 years.

**QUICKIE 2**

**Modular Frame Design**
- Multiple front frames and seat rails
- Independent cross brace and rear frame
- Allows for changes in user’s condition, function, growth, and/or environment

**Endless Options**
- Multiple caster, rear wheel, armrest, tire and handrim options
- Depth adjustable and angle adjustable backs
- Optional Quickie Xtender power assist wheels

**NEW Features!**
- 5-Spoke Mag Wheels with closed spoke design to prevent debris build up
- Swing in/out hanger design with intuitive release levers and tapered locking mechanism to prevent loosening over time
- Improved height adjustable ELR/ALR allows for better alignment with the knee joint for a natural motion
- Updated hemi frame and hanger for reduced seat heights

**QUICKIE 2 LITE**

The Quickie 2 Lite is everything you love about the Quickie 2 in a simple and ultra lightweight package.

- Overall standard weight as low as 25.5 lbs.
- Simplified option mix
- Fixed front frame option for rigid performance in a folding frame
- Smooth, contoured and stylish
  - Rounded rear frame
  - Reduced side profile
  - Q-Gusset

**Quickie QXi**

The Quickie QXi is a durable, low-maintenance folding frame that is perfect for the person looking for simplicity, longevity, and Quickie’s most popular options at the right price.
Ultra Lightweight Wheelchair Justification

**K0005**

- Per Medicare policy, “coverage of an ultra-lightweight wheelchair (K0005) is determined on an individual consideration basis.” The primary objective is to rule out all lower level equipment.

- Include a list of indoor and outdoor Activities of Daily Living (ADLs) and document what specific features the wheelchair base has that are medically needed by the end user.

- Although not required, a seating evaluation conducted by a clinician experienced in seating & positioning is strongly recommended.

- Documentation “must include a description of the patient’s routine activities. This may include the types of activities the patient frequently encounters and whether the patient is fully independent in the use of the wheelchair. Describe the features of the K0005 base which are needed compared to the K0004 base.”
